Detailing Supplies

[Top of The Line Home](#) > [Motor, Sail & House Boat Detailing](#) > [Boat Polishing & Waxing](#) > **Porter Cable Polisher**

Porter Cable Polisher

Porter Cable Polisher: By combining the motion of a disc polisher with an orbital type motion, the Porter Cable Orbital Polisher #7424 offers a random orbit pattern that eliminates any trace of a swirl mark. The machine is so mistake proof, anyone can use it.

Intended primarily for automotive detailing and boat maintenance, the 6" random orbit polisher also has a place in solid surface applications. Attach a sanding pad and you'll have a random orbit sander for automotive body repairs, as well as wood, solid surface, and metal sanding, (Accepts all 5" pressure sensitive sanding discs).

The 120V Porter Cable polisher has a powerful 3.7 amp motor, weighs 5.75 lbs, is 11.5" long, and is double insulated against shock. It features an electronic variable speed dial that can be adjusted between 2,500-6,000 orbits per minute (OPM). The hand grip can be attached to either side for right or left handed operators. Average price of the polisher is \$200.00, which makes this one an excellent buy.

The latest news is due to a very smart customer. I was asked if the Cyclo brushes would fit the Porter Cable. I had never thought of that!! Guess what? They certainly do! I quickly added them to the Porter Cable Accessory list. Now, all Porter Cable owners have an indispensable new tool.

Detailing Supplies

[Top of The Line Home](#) > [Motor, Sail & House Boat Detailing](#) > [Boat Polishing & Waxing](#) > [Porter Cable Polisher](#) > **Lake Country Pads**

Lake Country Pads

Lake Country Pads are our top selling item! Hundreds a week leave our store. The reason for this? They are well designed, tough, and versatile. We also offer them at a terrific price.

Do you like to roll your foam polisher pads as you travel across uneven surfaces? Our Lake Country Variable Depth foam pads are sloped toward the edge and have a cavity in the center. The cavity keeps cleaners from slinging out.

The 7.5" Lake Country foam pads have a 6.5" velcro back which fit our Metabo rotary polisher, or Porter Cable orbital polisher.

Choose the Yellow Cutting pad for oxidation, the White Polishing pad for surface swirls and scratches and the Black Finishing pad for waxing & polishing with one-step cleaner/waxes, glazes, paste waxes, polishes and sealants.

These 7.5" Lake Country pads require a 5"-6" velcro back plate for use with the Metabo Rotary Polisher, or the 6" DA back plate for use with the Porter Cable orbital.

Be sure and check out our NEW Lake Country Orange Pad!

(The Lake Country pads are too large for our 6" Terry, Baby Diaper or Microfiber bonnets.)

[Top of The Line Home](#) > [Motor, Sail & House Boat Detailing](#) > [Boat Polishing & Waxing](#) > [Porter Cable Polisher](#) > **Porter Cable Velcro Pad Holder**

Porter Cable Velcro Pad Holder

UPGRADE YOUR PORTER CABLE POLISHER to a lightning fast, "velcro" system with our 6" DA velcro back plate. Instead of throwing away both the pad and "permanently attached" back plate every time a pad wears out, you can just replace the pad. Velcro-backed pads are also more economical than the pad/backplate set-up that comes with the Porter Cable.

First, you'll need this 6" DA velcro back-plate will enable your Porter Cable polisher to use all of the velcro backed pads. Then you may choose from our 6" flat-faced velcro pads or the 7.5" Variable Depth Lake Country pads.

(The velcro back plate remains on the polisher, and the velcro-backed pads attach to the disk).

Detailing Supplies

[Top of The Line Home](#) > [Motor, Sail & House Boat Detailing](#) > [Boat Polishing & Waxing](#) > [Porter Cable Polisher](#) > **Lake Country Orange Pad**

Lake Country Orange Pad

Lake Country's new Orange "Super Pad" combines the qualities of the regular, Variable Depth (Variable Contact) pads into a single step process. It's not too light, or too aggressive. In fact, it's just right for most polishing jobs. This is it's secret. You can cut oxidation, remove swirls and scratches, and apply your waxes with one pad.

The Orange pad works well with all levels of polishes, compounds, or swirl removers. It produces magic with our professional Light Cut and Medium Cut pre-cleaners, or can be used with our lighter, Pinnacle and P21S high-end preps. It performs so well, you'll save time on clean-ups, and smear prevention. The pad itself, eliminates most smears.

Like the other Variable-Depth pads, the Orange "super pad" is durable, and can be cleaned with the soap you use to wash your vehicle.

The 7.5" Orange Pad is designed for use on our Porter Cable and Metabo polishers. It requires the 6" back plate.

Porter Cable Pads 6"

Porter Cable Pads 6": Our 6" x 1" Flat-Faced velcro pads are smaller than the Lake Country pads, and are great for polishing in tight areas. They are also the only pads that fit our 6" Microfiber, Terry, and Baby Diaper Bonnets.

The black "Polishing" Pad is used to to apply polishes, glazes, one-step cleaner/waxes, and swirl removers. The yellow "Cutting" Pad removes light to moderate oxidation. The white "Finishing" pad is used to apply paste and liquid waxes and paint sealants.

Detailing Supplies

[Top of The Line Home](#) > [Motor, Sail & House Boat Detailing](#) > [Boat Polishing & Waxing](#) > [Porter Cable Polisher](#) > **Micro Suede Bonnets 6"**

Micro Suede Bonnets 6"

Micro suede Bonnets 6": We are they only source for Microfiber, Micro-Suede Bonnets for the 6" Porter Cable polisher pads. Do not confuse these with regular Microfiber bonnets. They are designed to adhere to a surface, literally clinging to grease and film, taking it off in a single swipe. While this is desirable for most surfaces, it is a disaster for a waxed finish.

Micro-Suede Microfiber is very different. It glides across the surface, with a natural polish-like friction, that requires no effort. This unique trait makes Micro-Suede Microfiber one of the finest polishing materials in the world. Micro-Suede Microfiber is softer and finer than any other Microfiber or conventional cloth available today.

(These bonnets do not fit the Lake Country pads.)

Porter Cable DA Backplate/Pad

This is the type of pad that comes on the Porter Cable. It is a 6" DA (screw-on) backplate with the foam polishing pad permanently attached. Use with your cleaners, polishers, and waxes. You may also use this pad with our 6" Terry, Microfiber, and Baby Diaper Bonnets.

Choose this pad design if you do not want to update to a velcro backplate/pad set-up.

Porter Cable 4" Accessories

Porter Cable Pads & 4" Accessories: Now you can use 4" foam pads on your Porter Cable to do all of those areas too small for the 6"-7.5" pads. Our new 4" velcro pad holder makes it possible. Bug shields, wheels, around luggage racks, are all easily accessible. You can also remove the side handle of the polisher to reach closer and deeper than ever before.

The Mini 4" pad holder is from the same manufacturer as our durable 6" pad holder. You'll never have to worry about a pad coming loose from this velcro. It's super tough and extremely sticky. In fact, it's not easy to pull off a pad.

The 4" foam pads and shampoo brushes are from Cyclo mfg. The terry, microfiber, and baby diaper bonnets are all hand made just for the 4" mini foam pads.

Check below for all of the 4" accessories for our Porter Cable Polisher. **[Click on links for full size photo, product descriptions and ordering.](#)**

Detailing Supplies

[Top of The Line Home](#) > [Motor, Sail & House Boat Detailing](#) > [Marine Metal, Glass & Plastic Care](#) > [Light Cut Swirl Remover](#)

Light Cut Swirl Remover

Light Cut Swirl Remover is the secret to a wet-look shine. High gloss is due to the perfection of the finish, not the wax. Our Light Cut Swirl Remover is the key to producing that perfect shine on 90% of our customer's vehicles.

We sell more Light Cut than any other paint cleaner. Hi-Temp's remarkable formula safely wipes out swirls and oxidation on any type of paint including clear coat. It transforms new, or not-so-new paint into a slick, flaw-free finish.

This versatile surface prep will even restore the shine on smooth plastic. It will polish plastic bug shields, exterior trim, bumpers, camper windows, tail light lenses, and Plexiglas windshields. It removes buffer swirls and car wash scratches. Light Cut is silicone free and may be applied by hand, orbital polisher, or rotary polisher.

No product will create more gloss than Light Cut! No competing product creates a more perfect paint finish for your waxes. Light Cut is unmatched by any product, at any price!

APPLICATION:

- Apply a small amount to clean surface using a terry, hand-held pad or a foam polisher pad.
- Rub or buff in all directions. Swirls are curved, so you need to hit them from every angle. Continue until no product remains.
- Lightly buff-off with a dry terry towel. No need to wash again.
- Apply your choice of liquid or paste Carnauba, or polymer paint sealant.

Detailing Supplies

[Top of The Line Home](#) > [Motor, Sail & House Boat Detailing](#) > [Boat Polishing & Waxing](#) > **Medium Cut Polish**

Medium Cut Polish

Medium Cut products should remove swirls and scratches beyond the light cut formulas, but still be safe to use by hand. Top of the Line "Power Prep" is a medium cut paint leveler that removes 1,500-1,000 grit scratches without leaving swirls of its own. This eliminates the need for one of those follow-up products used after an abrasive compound. Power Prep will also remove heavy oxidation.

Power Prep polishes clear coat paint and marine Gel-Coat so perfectly, it can be followed by the wax. It may be used by hand or with a rotary or orbital polisher and foam pads. It's thick, creamy texture goes a long way.

Apply a small amount to a foam polishing or cutting pad and work into the paint until it disappears. Wipe-off with a towel before it dries. No strenuous buffing is required, and no white residue will remain.

Detailing Supplies

[Top of The Line Home](#) > [Motor, Sail & House Boat Detailing](#) > [Boat Polishing & Waxing](#) > **Klasse All-In-One SPECIAL!**

Klasse All-In-One SPECIAL!

Klasse All-In-One is much more than a simple wax, it is a real polish. It contains chemical cleaners for removing oxidation, old wax build-up, road tar and insect residue.

Klasse All-In-One Polish is also an acrylic-based paint sealant that provides long term protection against UV and salt damage. It is heat resistant and elastic by nature. All-In-One contains no abrasives or silicone and lasts an incredible 6 months.

Apply only one or two times a year! The one-step cleaner/sealant may be applied by hand or with an orbital polisher to any auto, motorcycle, RV, boat or aircraft. Use it to clean and protect paint, plastic, fiberglass, metals, and any other hard surface. Just apply a very small amount to a cloth or foam applicator, rub in circular motion, wipe off before or after it dries. (we prefer "before") The best tool for this if a terry towel, diaper or terry bonnet on an orbital.

Klasse's All-In-One is known for its great depth of shine and clarity. It will outlast and out-shine all of its competitors and is a joy to apply.

For added shine and durability follow with application of Klasse High Gloss Sealant Glaze.

10oz Klasse All-In-One Try Klasse in a convenient, sample size.

Klasse Sealant Glaze SPECIAL

If you're looking for a wax that lasts for more than 6 months, this is your product. Klasse's High Gloss Sealant Glaze protects paint for 6-8 months. It enriches color and shine. Klasse Sealant Glaze is so good, it has been voted the best long term wax by auto enthusiasts in the US and Germany.

Klasse's sealant contains no abrasives or water. It an an elastic acrylic which withstands wind, water, detergents and extreme heat. It is easy to apply by hand or with an orbital polisher. Klasse Sealant Glaze may be used over Klasse's "All-In-One" for truly unmatched perfection.

Sealant Glaze contains no cleaners, so apply after pre-cleaning with a surface prep.

Detailing Supplies

[Top of The Line Home](#) > [Motor, Sail & House Boat Detailing](#) > [Boat Polishing & Waxing](#) > **Blitz Wax SPECIAL**

Blitz Wax SPECIAL

Blitz Wax was once used on the royal carriages of Buckingham Palace. It is known for its clarity, ease of application, and award winning shine. Each can of Blitz Wax is an authentic original, handcrafted today by the same family that started One Grand in 1933.

Blitz is our most durable paste wax. It does not leave residue and is great on dark colors. When used as directed, Blitz Wax produces a deep, durable, clear finish which preserves and protects against all harmful elements.

Blitz Wax has no abrasives or cleaners. It's a great wax to use on large vehicles that are waxed 2-3 times a year. We recommend it for fleet vehicles, motor homes, boats and aircraft. Blitz may be applied by hand or machine.
